

New RePlant Drills Complete the System-Specific Drill Line

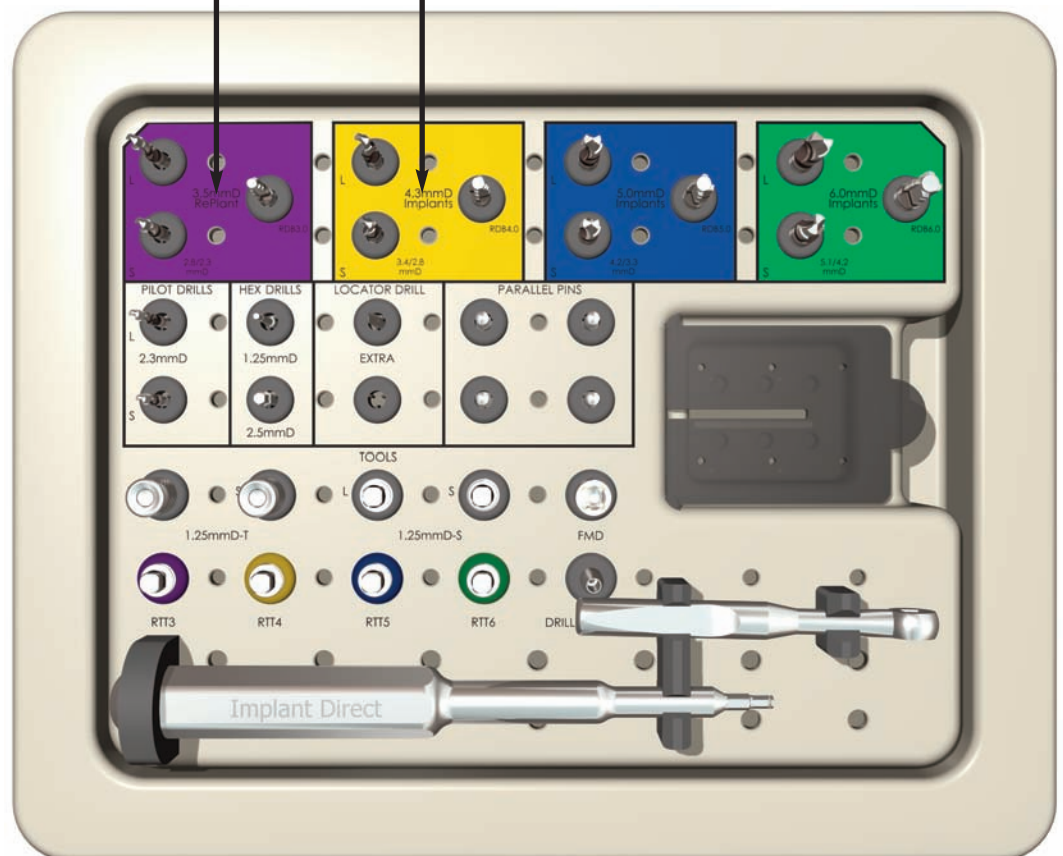

Effective immediately, the RePlant surgical trays (RCST and RBST) will feature a complete line of drills designed specifically for RePlant implants. The new consistency in drill names will simplify the surgical sequence – especially for those new to RePlant implants.

The RSB3 and RSB3S will replace the SD2.8 and SD2.8S that were previously packaged in the RePlant surgical trays. Similarly, the RSB4 and RSB4S will replace the SD3.4 and SD3.4S. All RSB drills may also be purchased separately.
